

Enhancing patient care with the Fullscript + Elation integration

Renew Integrative Wellness prioritizes whole person care, addressing root causes rather than just symptoms. Their approach blends functional medicine, integrative therapies, advanced diagnostics, and prevention to empower patients.

Extended visit times and direct provider-patient communication are central to personalizing the patient experience.

That said, delivering this level of care requires a careful balance—staying deeply engaged with patients while managing the operational demands of a growing practice. Seamlessly incorporating treatment plans, including lifestyle and supplement recommendations, into their existing workflow is key to maintaining both efficiency and the high standard of care their patients expect.

Technological integration

An advanced EHR system designed for functional and integrative medicine with Elation Health.

Seamless specialty lab integrations for comprehensive functional testing.

Stronger patient engagement with online portals and automated communication.

Integrated access to a high-quality dispensary for supplements and protocols via Fullscript.

How Renew Integrative Wellness makes the most of their Fullscript + Elation integration

To sustain efficiency and high-touch care, the practice integrated Fullscript with Elation's EHR, streamlining supplement management and treatment planning. Since implementation, all 654 active patients have been set up on Fullscript, with a sharp rise in activated plans and patient orders in just one quarter.

Renew Integrative Wellness' dispensing mix

In-office supplement dispensing to meet their patients' immediate needs.

Online supplement dispensing to make refills more convenient.

The Results

- ✓ High-quality supplement provision directly to patients.
- ✓ Enhanced patient compliance and simplified care plan creation.
- ✓ An efficient, digital-first workflow within Elation.
- ✓ Eliminates the need for manual tracking of supplement recommendations.
- ✓ Reduces patient confusion over product quality and sourcing.
- ✓ Improves adherence and treatment success through automated follow-ups.
- ✓ Creates an efficient, digital-first workflow within Elation.
- ✓ Supports a sustainable revenue model without inventory management hassles.

Patients have expressed their appreciation for the ability to order what they need, and the staff has noted the integration's positive impact on their workflow, highlighting the elimination of manual tracking and the support of a sustainable revenue model without the need for inventory management.
